

ISO Certified Quality at Hydro Engineering Innovation

At **Hydro Engineering Innovation**, we take pride in delivering world-class equipment backed by proven quality systems. Since **May 2009**, we have been certified to **ISO 9001:2008**, and in **2018**, we proudly upgraded our certification to **ISO 9001:2015** — ensuring we stay at the forefront of continuous improvement.

What Our Quality Program Covers

Our ISO-certified program supports the design and manufacturing of:

- **Hydroblaster** pressure washers
- **Hydropad** above-ground wash racks
- **Hydrokleen** wash water filtration and recycling systems
- A wide range of **specialty equipment** for industrial and government applications

Every aspect of our operations — from **Human Resources to Engineering, Purchasing, Fabrication, Assembly, Sales, Service, Parts, Shipping, and Safety** — follows detailed, documented procedures. Our management team reviews and measures these processes quarterly, always focused on one goal: eliminating anything that doesn't add value for our customers.

What This Means for You

Our commitment to ISO quality standards directly benefits our customers:

- **More accurate information** — from pricing and specifications to manuals and support documents
- **Customized production** — every machine is built to order using our Single Piece Flow process. You get exactly what you want, built to your precise specifications.
- **Stronger supplier partnerships** — we carefully measure and strengthen relationships with key suppliers to ensure reliability and quality.
- **Proactive inventory management** — we maintain higher on-hand inventory levels to reduce supply chain disruptions and keep your orders on track.

Continual Improvement You Can Count On

ISO 9001:2015 is all about driving continual improvement, and we're proud of the momentum it has created — not only within our company, but across our growing customer base.

We invite you to **experience the difference**. Place your next order with us, or visit our facility for a factory tour. See firsthand how your equipment is built to the highest standards of quality and precision.

Growth Ahead

On **July 1, 2025**, **Hydro Engineering, Inc.** was acquired by **Hydro Engineering Innovation LLC**. This marks an exciting new chapter for our company, ensuring continuity while fueling our primary goal: growth. We're energized by the opportunities ahead and look forward to building an even stronger future together!
